

Script Creadunet Version 3

Palement Bitcoin, Litecoin

For payments as Bitcoin, Litecoin ..., I use goUrl.

- 1- Create an account on: <https://gourl.io> (which supports a dozen coins)
- 2- Go to the page: https://gourl.io/info/memberarea/My_Account.html
- 3- Section 2. Your Cryptocoin Payment Box / Captcha and click on the Create New Payment Box for Your Website button
- 4- configure a new Paybox for a currency and your site, or click on edit to see the IDs to retrieve
- 5- copy these IDs into `/mods/payment/coin-gourl/bitcoin/configuration.php` for bitcoin or `/mods/payment/coin-gourl/litecoin/configuration.php` for litecoin

```
'boxID' => 1234,  
'publicKey' => '7304AAfSauBBitcoin99ATCPUBgNzLIVhGktNNCsbhOvG1OofG',  
'privateKey' => '7304AAfSauBBitcoin99ATCPRVLO4lkXpOyZUcT46M36hi8jRM',
```

To add a new type of corner, it is very simple:

Copy the entire directory `/ mods / payment / corner-gourl / bitcoin /` and name it for example speedcoin

And adjust the configuration!

Unique solution ID: #1043
